

(a) Policy $\times$ route

Full WOMD Command proxy	
Route following	valid control semantic violation
Constant velocity	negative control A negative control B

Same scene, initial state, dynamics,
50 steps, and per-policy control law.

(b) Paired divergence

(c) Admission before metrics

RF + full WOMD VALID (19/19)
RF + command proxy REJECT (19/19) semantic.command_only
CV + full WOMD VALID (19/19)
CV + command proxy VALID (19/19)

All four arms complete; completion alone does not make valid evidence.
